SUMMARY

I turn complex business requirements into reliable, easy-to-use software. Full-Stack Engineer with **3+ years** of experience building scalable, secure, and responsive applications across fintech, ed-tech, and e-commerce. Strong in **React.js, Next.js, Java and Springboot** with experience building **AI-powered** dashboards. Skilled in **REST API** design and third-party integrations such as Stripe and WhatsApp, with a focus on clean, maintainable, high-performance code.

EXPERIENCE

Fable Fintech **Sept 2025 – Present**
Full-Stack Engineer *Mumbai, India*

- Developed a white-label, multi-tenant accounting platform for exchange houses using **Next.js and Tailwind CSS**, enabling scalable and customizable financial workflows.
- Architected RESTful APIs for a cross-border remittance platform using **Java, Spring Boot and MySQL**, implementing maker-checker approval workflows for access management, invoicing, receivables, and payables.
- Built a reusable **Shadcn/UI** library, standardizing the platform's design system and reducing codebase size by **10%**.
- Delivered end-to-end financial features, including client and vendor management, inward and outward remittance transaction status mapping, and financial reporting interfaces.

Unico Connect **July 2024 – Sept 2025**
Software Engineer *Mumbai, India*

- Developed an AI-powered EdTech platform using **React.js + TanStack Query** improving productivity by **30%**.
- Created a reusable **Storybook component** library, reducing development time by **40%** across **3+ projects**.
- Optimized **Spring Boot** API performance through **pagination, caching and JPA query tuning**, achieving **sub-second response times** for high-volume operations.

BridgeLabz **Sept 2023 – July 2024**
Software Engineer Intern *Mumbai, India*

- Developed CRUD-based full-stack applications using **React.js, Java, Spring Boot and MySQL**.
- Followed test-driven development practices while collaborating with the development team.

PROJECTS

OmneyPay - Cross-Border Remittance Platform | *React.js, React Hook Form, Tailwind CSS, Spring Boot, MySQL*

- Built a financial operations platform for **invoicing, receivables, payables, and client/vendor management**, streamlining business workflows.
- Developed **financial analytics and transaction workflows** to support cross-border remittance operations.
- Integrated **Stripe** to support secure payment processing and streamline online payment workflows.

Highlands Brain - EdTech SaaS Platform | *Next.js, Hero UI, TypeScript, Zustand, Tailwind CSS*

- Enhanced a SaaS platform with role-based users for Admin, Staff, and Student using **Next.js, Tailwind CSS, Zustand, and Hero UI**.
- Developed a ticket-based support system, digital master agreement signing, analytics, and student attendance tracking, reducing report processing time by **25%** and streamlining administrative workflows.

ExCore - Multi-Tenant Accounting Platform | *Next.js, TypeScript, Java, Spring Boot, MySQL*

- Developed an accounting platform implementing modules for user access management, chart of accounts, ledger creation and group onboarding and configuration.
- Engineered **maker-checker approval workflows and REST APIs** with **Spring Boot and Spring Security**, enforcing tenant-level data isolation and transactional integrity via **JPA/Hibernate**.
- Integrated **WhatsApp API** to automate financial notifications and facilitate timely communication across business workflows.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS, Shadcn/UI, Zustand, TanStack Query
Backend: Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, JWT Authentication
Databases: MySQL, MongoDB
Integrations & Tools: Stripe API, WhatsApp API, Maven, Git, Github, Postman, Swagger, Vite, Netlify, Vercel

EDUCATION

Atharva College of Engineering (University of Mumbai) **Aug 2018 – Aug 2022**
B.E ***(CGPA: 7.78)*** *Mumbai, India*
